REFERENCE: Freedom of Information Act Appeal, Case No. 2014-2328

Dear Mr. Hall:

We have received a letter from Ms. Sarah Kotler, Deputy Director, Division of Freedom Information, Food and Drug Administration (FDA), dated March 19, 2014, advising us that we will be charged several thousands of dollars to obtain documents in response to our FOIA request to answer a series of questions. Responses to these questions can provide evidence of gross fraud, waste and abuse in the government's handling of the FoodQuestTQ matter. Of course, the most important measure of truthfulness is the actual documented record of wrongdoing.

We believe that the American people have the right to know about the gross fraud, waste and abuse taking place within the FDA and the Department of Health and Humans Services (HHS) in the government's handling of the FoodQuestTQ matter. In our case, the FDA has leveraged the power of the federal government to compete directly with our small business by plagiarizing our copyrighted research and pirating our patent and trade secrets to duplicate the commercial products we were already selling to the food industry.

The actions of both the HHS and FDA constitute a compelling need for prompt public disclosure. The responses to our FOIA request will disclose plagiarism by government employees, copyright violations, patent piracy, the theft of trade secrets by government employees and conspiracy by both HHS and FDA employees to obstruct justice and grossly violate ethics and procurement integrity laws. Responses to the FOIA request will be used by FoodQuestTQ to raise the public awareness of the gross fraud, waste and abuse currently taking place within HHS and the FDA.

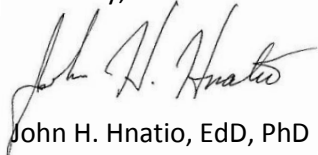

We do not currently have the resources to pay thousands of dollars for the FDA to answer our FOIA requests. This is because of the actions already taken against us by the Department of Health and Human Services and the FDA. By plagiarizing our research, pirating our patents, stealing our trade secrets and duplicating and giving away for free the commercial software tools we were already selling to the food industry we do not have the revenues required to pay the large "processing fees" now being demanded by the HHS and the FDA. Of course, the government is fully aware of the financial crisis they have created for our small company and know full well we cannot afford to pay the "processing fees" that are now being demanded.

I am a highly educated professional who has published many articles. I ask that you please consider me as a "free-lance" journalist trying to expose gross fraud, waste and corruption within the FDA and HHS in considering this appeal to Ms. Kotler's letter of March 19<sup>th</sup>. I will be happy to certify my significant past

FoodQuestTQ LLC, 4720 Hayward Drive, Frederick, Maryland 21702 Telephone 240-439-4476 ext. 11

record of publication and my intent to promptly publish the results of this FOIA request for public knowledge as soon as the requested information is made available to me.

Sincerely,

A handwritten signature in black ink, appearing to read "John H. Hnatio". The signature is written in a cursive style with a large initial "J".
