

MEMORANDUM FOR: Record
SUBJECT: Status of FoodQuestTQ Matter
DATE: December 1, 2014

The purpose of this memorandum is to document the current status of the matter of FoodQuestTQ LLC and the Department of Health and Human Services (HHS) and the Food and Drug Administration (FDA).

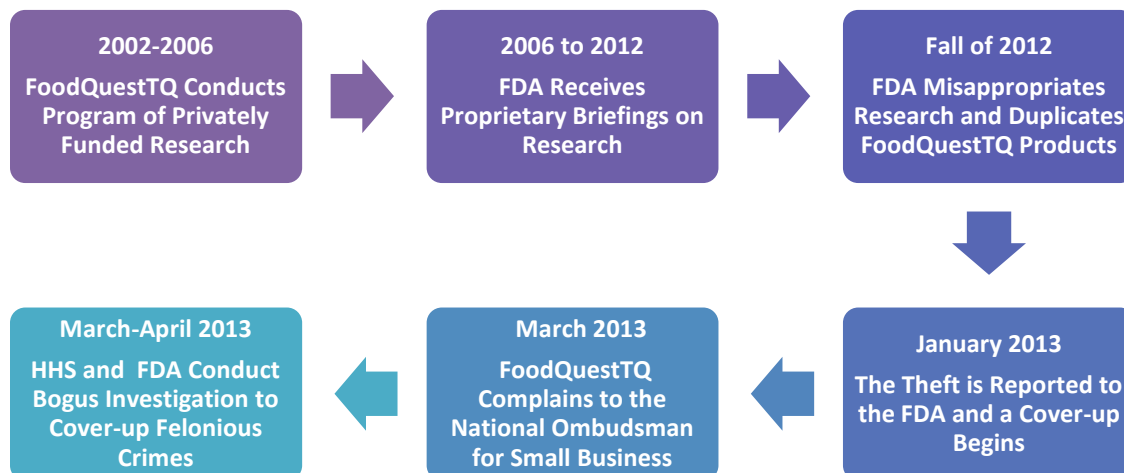

Background

FoodQuestTQ LLC is a small company that builds risk management software to make the food we all eat safer. The Department of Health and Human Services (DHHS) and the Food and Drug Administration (FDA) are unlawfully competing with FoodQuestTQ LLC. Since at least 2007 to the current time, the FDA is engaging in a purposeful six-step scheme to defraud FoodQuestTQ LLC by misappropriating FoodQuestTQ LLC’s research and duplicating the small company’s commercial products. To implement their scheme, DHHS and FDA are violating numerous Federal laws.

The Scheme

The six-step scheme consists of: 1) identifying FoodQuestTQ LLC developed technology as important to the mission of the FDA; 2) intentionally circumventing a large and long-standing body of Federal procurement law to duplicate the company’s commercial products; 3) turning to a group of “preferred” U.S. Government contracted agents to duplicate “in-house” FoodQuestTQ LLC products; 4) intentionally resisting mediation; 5) the use of intimidation, coercion and extortion to silence FoodQuestTQ LLC, and; 6) obstructing justice by preventing the release of and spoliating evidence that demonstrates felonious criminal conduct by employees of the U.S. Government.
